An architectural view of spatial data infrastructures
# Contents

Introduction 1

## Context

1.1 Information Infrastructures and Systems of Systems ............... 5
   1.1.1 Information Infrastructures ................................ 6
   1.1.2 Systems of Systems ........................................ 7
   1.1.3 Information Infrastructures as Systems of Systems .......... 9
1.2 Spatial Data Infrastructures ...................................... 11
   1.2.1 Technical Roots in Digital Libraries ........................ 12
   1.2.2 Web Services and Service Oriented Architectures for SDIs ... 16
   1.2.3 SDIs as Information Infrastructures and Systems of Systems . 17
1.3 Models and Patterns ............................................. 21
1.4 Software Architecture ............................................ 23
   1.4.1 Views and Beyond ......................................... 24
   1.4.2 ISO Reference Model for Open Distributed Processing ....... 25
1.5 Main Topics in this Book ......................................... 26

## A Model for Spatial Data Infrastructures in the Enterprise Language of the RM-ODP

2.1 Introduction ................................................... 30
2.2 Previous Work .................................................. 31
2.3 SDIs in the Enterprise Language of the RM-ODP .................... 33
3 A Component & Connector Architectural Style for Spatial Data Infrastructures

3.1 Introduction ......................................................... 65

3.2 An SDI style for the C&C viewtype ............................. 67

3.2.1 Previous work on SDI architectural models .................. 69

3.2.2 Component types ............................................... 70

3.2.3 Connector types ............................................... 72

3.2.4 Properties ..................................................... 75

3.2.5 Constraints ..................................................... 76

3.3 Analysis of real SDI architectures ............................... 80

3.3.1 Architecture of the Galicia CMA SDI ......................... 80

3.3.1.1 User requirements ........................................ 81

3.3.1.2 Architecture ............................................... 85
